

LOST CLOUD
family restaurant

LOST CLOUD Restaurant located in the ancient port city Famagusta, north Cyprus, near the sea and what is more the site is the bordering with the ghost city Varosha. It is a destination area of the city. Parents bring their children to the playground, because it is safe and calm place. I thought that it would be a wonderful idea to design here a cozy, calm atmosphere for the family restaurant.

The building was built in the 50-60's, the style is modernism. The building had a lot of opening elements and cantilever parts. It gives me an idea of something lightweight and bright. I came to the concept of **CLOUD**.

The cuisine is international. Starting at 7am from Monday to Sunday till 11pm. At weekend there are some nice courses for parents and their children. Parents can participate some different seminars and in the same time their children can cook paste, cakes or play with their cousins. In the interior used bright palette and a lot of natural light to create a very welcoming atmosphere.
